DOYLESTOWN COMMUNITY PEDESTRIAN-TRANSIT LINKAGE PROJECT

Doylestown Borough, PA

The Doylestown Community Pedestrian-Transit Linkage Project was funded through a Transportation & Community Development Initiative (TCDI) planning grant awarded by the Delaware Valley Regional Planning Commission (DVRPC). The purpose of the plan is to provide and identify accessible routes in conjunction with wayfinding signage to facilitate and enhance the pedestrian experience. Creative use of signage, directional markers and lighting are proposed in strategic locations throughout the Borough to provide the link between the Borough's Public Transportation Facilities, Cultural District, Business District and the Bucks County Justice Center.

Services Provided by G&A

- Coordination with Delaware Valley Regional Planning Commission
- Grant Administration
- Landscape Architecture
