

GILMORE & ASSOCIATES, INC.

FULL SERVICE CIVIL ENGINEERING & CONSULTING

FONT ROAD CULVERT Upper Uwchlan Township, PA

The Township completed the replacement of the Font Road Culvert in December 2007. This was a challenging project in that the Township wanted to increase the capacity of the culvert while maintaining the historic character of the area. The solution was a prefabricated concrete arch structure which is approximately 4 times wider than the original structure and fabricated to give the appearance of natural stone.

Services Provided by G&A
