

GILMORE & ASSOCIATES, INC.

FULL SERVICE CIVIL ENGINEERING & CONSULTING

DOYLESTOWN COMMERCE CENTER Doylestown Township, PA

The Doylestown Commerce Center is a Class A office complex, consisting of two office buildings, with an on-site daycare facility. Gilmore & Associates, Inc. designed the site to protect existing mature woods and wetlands and to promote groundwater recharge. This site design makes use of a porous paving system for stormwater management. Runoff percolates through the parking areas where it can then infiltrate into the sub-soil. By combining the stormwater management system with the parking lot facility, total disturbance to mature trees and wetlands was minimized.

Gilmore & Associates, Inc. also designed several retaining walls for the site and provided the landscape design for the central water feature.
